

Window Sweaters

37 app colourways / 12 pt borders / 6 stitch rows

A little knit for every window. App-inspired palettes meet classic checks, stripes, and zigzags, with visible yarn throughout the collection.

Choose Pattern > By App in the menu bar to use these colourways. All examples are generated by the app renderer from built-in styles, without personal overrides.

A shared design language. Spotify and Notion share checks. Teams, Cursor, Codex, and ChatGPT share zigzags in app-inspired palettes. Codex and ChatGPT intentionally use the same sweater.

Look closer. The following pages show full windows, enlarged yarn, and all four corners. Most patterns continue into the corners; stitch direction changes and partial motifs can be visible at the joins.

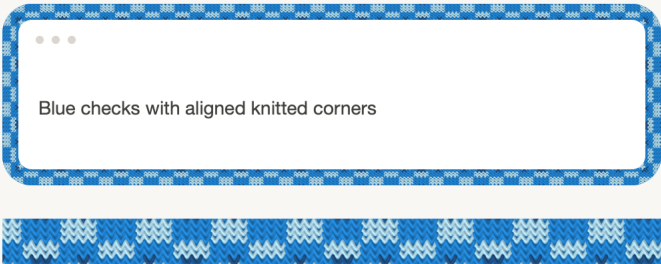

Browse: pages 2-6 show the collection at a glance; pages 7-43 show individual apps. Use the PDF bookmarks to jump to a favourite.
