

Window Sweaters

37 app colourways / 12 pt borders / 6 stitch rows

One soft zigzag, across the whole collection. A consistent knitted rhythm gives every window a related look while retaining its app-inspired base colour.

Choose Pattern > Zigzag in the menu bar. Global Zigzag pairs each app's base yarn with a shared soft pink contrast yarn. It does not reproduce all the colours of the custom By App sweater.

Quiet colour differences. The pattern is subtle on pale base yarns. Apps that share a base colour can look identical in this mode. The custom zigzags in By App use their own contrast colours.

Actual renderer output. These examples use built-in profiles without personal overrides. Full windows, enlarged yarn, and four corner details show the texture and joins at one reference size.

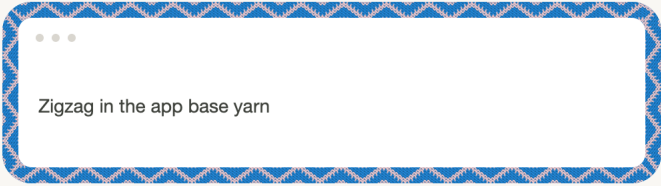

Browse: pages 2-6 show the collection at a glance; pages 7-43 show individual apps. Use the PDF bookmarks to jump to a favourite.
